HENRYI

(The orange-yellow speciosum)

Too much cannot be said in praise of this fine Lily; its constitution is of the hardiest; it is very free flowering, reaching six or more feet in height when established, and bearing up to 20 flowers, which are of a rich deep orange-yellow, very telling in point of color and well set off by the deep green foliage. The fact that it is seen doing so well in so many gardens shows its sound constitution and good flowering qualities. It is one of the best Lilies ever introduced, and one which we confidently recommend. Stem-rooting. August-September. 6 to 8 feet. Blooming. 20c each; \$2.00 per doz. Large, 30c each; \$3.00 per doz.
